EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Diana Charlton on 30 July 2004.

2. The application has been amended as follows: In the last line of claims 1, 18, 52, and 53, the period (.) has been replaced with the phrase --, wherein the insert is able to move 360 degrees around the track pin.--

In line 2 of claim 1, a comma (,) has been inserted after the term "structures". In line 3 of claim 6, a period (.) has been added after the term "insert".

These changes are to correct minor grammatical errors and to further define the invention.

Allowable Subject Matter

3. Claims 1-37 and 45-58 are allowed.

4. The following is an examiner's statement of reasons for allowance: The claims as amended, setting forth a track joint assembly having a track chain with first and second structures, and a track pin extending therebetween, wherein an insert surrounds a

Art Unit: 3617

portion of the track pin and is free floating positioned between the track pin and on of the first and second structures, and the insert is able to move 360 degrees around the track pin, have been found to be allowable over the prior art. The prior art does not show or fairly suggest a track joint assembly having insert mounted between a track pin and structures of the track chain, the insert being able to move 360 degree around a track pin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Terminal Disclaimer

5. The terminal disclaimer filed on 17 February 2004 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of US Patent 6,485,116 B1 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Larson et al reference teaches the use of an insert that is free floating positioned between a pin and a structure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason R Bellinger whose telephone number is 703-308-6298. The examiner can normally be reached on Mon - Thurs (9:00-4:30).
